

Empowering continuous modernization with Kyndryl cloud-native services for AWS

Highlights

- Plan a modernization journey built on best practices framework, processes, and assets
- Provide simplicity in a volatile, complex environment to enhance agility, efficiency, and predictability
- Integrate the full lifecycle of modernization services for a seamless, scalable, security-rich solution that empowers progress and business growth

The future of IT is driven by continuous modernization. Enterprises around the world face mounting pressure to deploy and scale faster while deriving greater value from cloud resources, but many lack the cloud skills, cloud-aligned processes, and cloud-ready management tools necessary for successful digital transformation.

- Limited visibility and control over cloud usage, costs, and performance
- Difficulty ensuring compliance requirements
- Cloud environments that restrict scalability and hinder production deployments
- Traditional operations with layers of manual effort that undercut the agility cloud has to offer

Kyndryl can help. Our cloud-native services for AWS provide continuous optimization through periodic review cycles that identify opportunities to improve costs and performance. These end-to-end, pre-integrated services are designed around a set of best practices frameworks, processes, and assets we've developed to drive simplicity in a volatile, complex environment and enhance agility, efficiency, and predictability.

- Open, security-rich digital operations that scale with your business
- Proven, repeatable methodology for all sizes and complexities of workloads on AWS
- Pre-integrated modernization services for a seamless, scalable solution that empowers progress and business growth
- End-to-end services that cover transformation needs from design and implementation to modernization and management

Our modern managed services provide a foundation for cloud modernization and cloud-native application development to unlock benefits across cost, efficiency, agility, and innovation with the AWS Cloud Platform. Designed from the ground-up to make the most of cloud-native architecture principles and AWS-native tooling, our non-disruptive approach accelerates cloud adoption by aligning to cloud adoption framework and minimizing the need for expensive tools and third-party vendor lock-ins.

Wherever you are in your cloud transformation journey, Kyndryl can meet you there. With solutions tailored to your unique requirements and areas of focus, our experts will work with you to design, strategize, rebuild, manage, or further modernize your environment while securing applications and infrastructure and scaling innovations to align with business outcomes.

Why Kyndryl?

Kyndryl has deep expertise in designing, running, and managing the most modern, efficient, and reliable technology infrastructure that the world depends on every day. We are deeply committed to advancing the critical infrastructure that powers human progress. As an AWS Premier Tier Services Partner, we invest in building a global AWS practice with the skills, services, and expertise to deliver an exceptional customer experience. We're building on our foundation of excellence by creating systems in new ways: bringing in the right partners, investing in our business, and working side by side with our customers to unlock potential.
